

Water Meter Radio Removal when Re-Siding House

When you have your siding replaced and are on City water, the water meter radio needs to be removed and reinstalled. This is to ensure that the water meter can be continued to be read. It is important to protect the wires while the radio is not in place and the siding is being replaced. Please see the example below on how to remove the water meter radio.

***Radio hardwired**

1. Remove cover and disconnect wires.

2. Remove screws to radio base. Protect wires for connection at later date.

PUT RADIO IN SAFE PLACE FOR REINSTALLATION AT LATER DATE.

If you have any questions, please contact Public Utilities at (763) 767-5152
