

The City of Andover has completed and submitted our service line materials inventory to the Minnesota Department of Health. The service line inventory is publicly available, and you can check the materials for your service line by visiting the Lead Inventory Tracking Tool (LITT) at <https://maps.umn.edu/LSL/> you may also contact us at 763-767-5180 with any questions. To complete the service line inventory our system used the city building code to show that we have never allowed any service line other than non-lead, which was inspected at the time of installation. As of 5/13/24, our inventory contains 0% lead, 0% galvanized requiring replacement, 0% unknown material, and 100% non-lead service lines.
